 MARIN MUNICIPAL WATER DISTRICT

Never dump oil, chemicals, soapy water, trash, or anything else down the storm drain—the only thing that should EVER go down a storm drain is rain water.

Replace your lawn with drought-tolerant ground cover and water-wise plants. Learn about sheet mulching, rainwater harvesting and greywater use.

The average shower uses 25 gallons of water but if you use the "wet down, soap up, rinse off" method, you use around 5 gallons of water. A bathtub can hold up to 36 gallons of water, so take showers instead of baths.
